

SOL-AER®

WINTER TURF BLANKETS

Welcome to the next generation of winter turf protection!

Turf protection is a must to protect fields from harsh winter and cold weather conditions. We offer a revolutionary non-woven co-polymer fabric that is unlike others on the market and delivers improved insulation for grass root systems. The secret is a proven heat-absorbing silver lace coating that will keep your turfgrass safe through the winter months so it comes out healthy in the spring.

- **Fabric:** A unique Non-Woven material that is composed of bi-component fibers:
A polypropylene core sheathed in polyethylene means strength and durability, plus superior nighttime insulation.
- **Silver Lace Coating:** Combines with good sunlight penetration to increase daylight warming and decrease nighttime cooling. Same lace coating as on competitive Radiant product.
- **Fusion Welded Seams:** Eliminates sewing and allows this super tough fabric to be moved and walked on without damage.
- **Light One-Piece Construction:** Easy to hand cut without fraying, making for easier installation, removal and storage.

With its ground-breaking non-woven co-polymer fabric and proven heat absorbing/reflection lace coating SOL-Aer® Winter Turf Blanket is the best turf protector ever.

- Vipol Edging adds strength and breathability.
- Non-woven fabric provides additional thermal insulation.
- Provides frost protection and moisture retention.
- Promotes earlier and more rapid germination and greening.
- Standard Sizes: 10'x20' – 20'x50' – 50'x60' – 60'x90' – 70'x90' – 90'x90' – 80'x110'
- Custom sizes and cuts are readily available.

Available Colors: Silver Lace Coated or Uncoated Basic White Available

Finishing: Vipol® Edging with Grommets
