

TUFFY®

WORLD-CLASS WINDSCREENS

Enhancing the pickleball experience for players.

What does every pickleball player want? It's simple: the right equipment and the right court, as together they add up to the optimal pickleball experience.

A windscreen is appreciated by everyone who plays on a pickleball court. Choosing the right screen not only makes for a more enjoyable playing experience, but also improves the overall look and feel of a court.

Our windscreens are produced and installed by a team of engineering, design, and technical experts and are proven to withstand the elements. Our fully customized screens range from simple backgrounds to more elaborate designs that make a visual "pop", all delivered via our CHROMA-BOND® world-class printing.

A facility – whether it has a single court or an entire pickleball facility – takes pickleball to the next level with Aer-Flo Sports windscreens.

Increase Player Visibility | Reduce Visual Distractions | Remove View of Unwanted Onlookers
